BUILD A CAREER IN ENVIRONMENTAL SCIENCE

Learn the skills needed to succeed in the field.

The Associates program is designed to prepare students for employment or transfer to the Bachelors of Science in Environmental Science or other institutions of higher learning in such areas as wildlife management, environmental quality, and range and grassland management.

The B.S. degree in Environmental Science from Sitting Bull College will provide SBC graduates with a degree that will allow them to compete for jobs and receive career advancement, while obtaining their B.S. degree in environmental science locally. Graduates from SBC’s environmental science program will provide essential support for managing local natural resources. Standing Rock Sioux Tribal agencies have expressed an interest in hiring SBC’s graduates and those applicants who have showed a dedication to management and an appreciation of field work experience.

The Master’s degree in Environmental Science lets students take this learning even further and gain skills and expertise to propel careers and research forward.
ENVIRONMENTAL SCIENCE
MASTER’S PROGRAM

The Master of Science in Environmental Science program at Sitting Bull College prepares graduates as leaders in environmental, wildlife, and natural resource management fields. Students attain education through research, practical application, and the use of modern technology in order to build intellectual capital. The educational process is guided by western science methodologies balanced with traditional Lakota/Dakota cultural values.

The graduate program in Environmental Science (ENS) is an extension and builds off of the college's current A.S. and B.S. programs. The program description for the B.S. program states that it is designed to provide students with a background sufficient to make them competitive in the workplace for careers in environmental science, natural resource management, wildlife management, and other science-related disciplines. The program will prepare students to conduct scientific research using methodology necessary to attain results that will be used for science-related, managerial decisions. The graduate program will build upon the objectives of the B.S. program by allowing students to gain greater skills in specific areas.
